

A Step by Step Guide on how to Send Push Notifications:

1. Push Notifications:

Login to 'Dashboard' and open your event which you want to send the Event Notifications.

Click on the 'Push Notification' module.

Type the Message title and message, and the admin can send over the notifications instant or scheduled.

Once the notifications are sent successfully, the admin has the option to check out the notification list that was sent.

Click on the Notifications to check out the list of notifications.

The screenshot shows the 'New Push Message' form. At the top, there is a 'User Dashboard' dropdown, a profile icon for 'WebMOBI CMO Roundtable 2020', and a 'Notifications' bell icon. Below this, there are two tabs: 'New Push Message' and 'Notifications'. A red arrow points to the 'Notifications' tab. The form contains a 'Notifications' section with a text input field labeled 'Enter notification text here' and a larger text area labeled 'Type message here'. Below these are 'Platforms and Reciepts' with radio buttons for 'Broadcast' (selected) and 'One Device', and a dropdown menu set to 'Android'. Under 'Delivery Schedule', there are radio buttons for 'Immediately' (selected) and 'Schedule'. A 'Send' button is located at the bottom right of the form.

The screenshot shows the 'Notifications' list. At the top, there is a 'User Dashboard' dropdown, a profile icon for 'WebMOBI CMO Roundtable 2020', and a 'Notifications' bell icon. Below this, there are two tabs: 'New Push Message' and 'Notifications'. A 'New Notification' button is located in the top right corner of the notification list. The list contains one notification with the text 'Test' and a scheduled time of 'Scheduled on Fri Nov 29 2019 06:00:00 GMT-0500 (Eastern Standard Time)'. There are also icons for 'eye' and 'x' next to the notification.

Notifications	New Notification
Test	Scheduled on Fri Nov 29 2019 06:00:00 GMT-0500 (Eastern Standard Time)

Here you are, so the attendees will start to get the notifications once they install the event app on their mobile devices.
